

USER MANUAL

CLASSIC DELAY

Thank you for spending time and money to buy this analog delay pedal. The Analog delay is designed for guitar with classic warm delay effects. We have tried our best to provide you a high quality effect, we recreate the old school tape sound of delay, and you can adjust its delay time up to 530ms and the feedback from 0-100%. Hope that you will enjoy using it.

Attentions

Power Supply

Please make sure your pedal is connected to an DC adapter with 9V ($\pm 10\%$) voltage. Unplug the DC adapter when not using the product or during the thunder storm.

Connections

Please always turn off the power of the equipment when connecting or disconnecting with the pedal. It will help to prevent the damage cause to this product and other relevant equipment.

Interference

Radio and television which is placed nearby the pedal may cause reception interference. Please use the product in a suitable distance from radios and television.
