

USER MANUAL

OVERDRIVE-AMP

Thank you for spending time and money to buy the OVERDRIVE-AMP. The OVERDRIVE-AMP is designed for guitar with classic TUBE sound. We have tried our best to provide you with high quality effect with the idea of some types of classic tube overdrive in the 1970' s. We hope that you will enjoy using it.

Attentions

Power Supply

Please make sure your pedal is connected to an DC adapter with 9V ($\pm 10\%$) voltage. Unplug the DC adapter when not using the product or during the thunder storm.

Connections

Please always turn off the power of the equipment when connecting or disconnecting with the pedal. It will help to prevent the damage cause to this product and other relevant equipment.

Interference

Radio and television which is placed nearby the pedal may cause reception interference. Please use the product in a suitable distance from radios and television.

⑧ TRUE BYPASS Footswitch

Use the footswitch to select Overdrive or true bypass fuction.

Main Characteristic

- Producing a natural and smooth overdrive sound
- Recreate the sound of tube drive with dynamic response of a classic tube amplifier.
- Full metal shell compact design with small-sized
- True bypass switch
- DC 9V adapter power supply

Technical Specifications

INPUT	1/4" monaural jack(impedance:2.2M Ohms)
OUTPUT	1/4" monaural jack(impedance:10K Ohms)
Power Supply	DC adapter 9V
Current Draw	5mA(DC 9V)
Dimensions	90mm(D) x 40mm(W) x 49.5mm(H)
Weight	300g
Accessories	User manual
